

CURRICULUM VITAE

Haiden A. Huskamp

Date Prepared: May 17, 2024

Office Address:

Harvard Medical School
Department of Health Care Policy
180 Longwood Avenue, Rm 330A
Boston, MA 02115

Work Phone: 617-432-0838

Work E-Mail: huskamp@hcp.med.harvard.edu

Work FAX: 617-432-0173

Education:

1989 B.A. (Honors) Public Policy, Duke University

1997 Ph.D. Health Policy, Economics Concentration, Harvard University

Faculty Academic Appointments:

1997-2004 Assistant Professor of Health Care Policy, Department of Health Care Policy,
Harvard Medical School

2004-2010 Associate Professor of Health Care Policy, Department of Health Care Policy,
Harvard Medical School

2010-2017 Professor of Health Care Policy, Department of Health Care Policy,
Harvard Medical School

2017-2020 30th Anniversary Professor of Health Care, Department of Health Care Policy,
Harvard Medical School

2018 Visiting Scholar, Health Policy & Management,
Johns Hopkins Bloomberg School of Public Health

2020- Henry J. Kaiser Professor of Health Care Policy, Department of Health Care Policy,
Harvard Medical School

Other Professional Positions:

1988-1989 Research Assistant, National Governors' Association, Washington, DC

1989-1990 Program Analyst, U.S. Dept. of Health and Human Services, Washington, DC

1990-1992 Associate, Alpha Center for Health Policy, Washington, DC

Harvard Committee Service:

- 1994-1999 Member, Board of Freshman Advisors, Harvard College
- 1998-1999 Member, Junior Faculty Search Committees, Harvard Medical School
- 1999-2001 Member, Committee for Undergraduate Education in Health Policy, Harvard University
- 2000-2001 Member, Harvard Health Caucus Advisory Board, Harvard Medical School
- 2000- Member, Standing Committee on the Degree of Doctor of Health Policy, Harvard University
- 2005-2006 Member, Education Reform Committee on Fundamentals of Medicine, Harvard Medical School
Co-Chair, Subcommittee on Health Policy and Managerial Sciences
- 2006-2007 Member, Center for Population Health Medical Education, Harvard Medical School
Co-Chair, Subcommittee on Pre-Clinical Education
- 2007-2008 Member, Strategic Advisory Group on Education, Harvard Medical School
- 2007-2008 Member, Junior Faculty Search Committee, Harvard Medical School
- 2009 Member, Curriculum Committee, Harvard Medical School
Member, Research Compliance Advisory Committee, Harvard Medical School
- 2010-2011 Member, Liaison Committee on Medical Education (LCME) Review, Harvard Medical School
Chair, Ph.D. Program in Health Policy Committee on Fellowships, Harvard University
- 2010-2011 Member, Junior Faculty Search Committee, Harvard Medical School
Member, Faculty of Arts and Sciences Standing Committee on Health, Harvard University Policy
Member, Safety Committee, Harvard Medical School
- 2013-2023 Member, Senior Faculty Search Committee, Harvard Medical School
- 2014-2015 Member, Pathways Curriculum Design Committee, Harvard Medical School
Chair, Social and Population Science
- 2015-2016 Member, Junior Faculty Search Committee, Harvard Medical School
Member, Executive Committee on Higher Degrees in Health Policy, Harvard University
- 2017-2020 Member, Advisory Committee on Shareholder Responsibility, Harvard University
- 2019 Member, Research Rigor and Reproducibility (R3) Committee, Harvard Medical School
- 2020- Chair, Standing Committee on Rights and Responsibilities, Harvard Medical School
- 2020- Executive Committee Member, Training in Oncology Population Sciences (TOPS) NCI T32 Fellowship Program

Grant Review Activities:

- 1998 Ad-hoc Grant Reviewer, The Substance Abuse and Mental Health Services Administration, *U.S. department of Health and Human Services*
- 2002 Ad-hoc Grant Reviewer, Changes in Health Care Financing and Organization (HCFO Program), *Robert Wood Johnson Foundation*
- 2005 Ad-hoc Reviewer, Study Section Review Panels, *National Institute of Mental Health*
- 2006 Ad-hoc Reviewer, Health Services Organization and Delivery Study Section, *National Institute of Health*
- 2010 Ad-hoc Reviewer, Special Emphasis Panel Study Section, *Agency for Healthcare Research and Quality*
- 2012 Ad-hoc Reviewer, Special Emphasis Panel Study Section, *National Institute of Mental Health*
- 2013 Ad-hoc Reviewer, R24 Planning Grant Study Section, *National Institute of Mental Health*
- 2013 Ad-hoc Reviewer, Special Emphasis Panel Study Section, *National Institute of Mental Health*

2015 Ad-hoc Reviewer, Contracts Study Section, *National Institute of Mental Health*
 2017 Ad-hoc Reviewer, Fellowships and Dissertation Grants Study Section, *National Institute of Mental Health*
 2020 Ad-hoc Reviewer, SERV Conflicts Study Section, *National Institute of Mental Health*
 2020 Ad-hoc Reviewer, T32 Study Section, *National Institute of Mental Health*
 2021 Ad-hoc Reviewer, RFA Review, *National Institute on Alcohol Abuse and Alcoholism*

Editorial Activities:

1997 Ad-hoc Reviewer
Journal of Health Economics
Inquiry

1998- Ad-hoc Reviewer, *Health Affairs*
 1999 Ad-hoc Reviewer, *Health Care Financing Review*
 2000 Ad-hoc Reviewer, *Administration and Policy in Mental Health*
 2001- Ad-hoc Reviewer
Psychiatric Services
Milbank Quarterly
Journal of Mental Health Policy and Economics
Journal of Economics and Management Strategy

2002- Ad-hoc Reviewer
Medical Care
Health Services Research

2003- Ad-hoc Reviewer, *Journal of General Internal Medicine*
 2004- Ad-hoc Reviewer
New England Journal of Medicine
Journal of Health Politics, Policy and Law
Archives of General Psychiatry

2004- Co-Editor, *Psychiatric Services*, *Economic Grand Rounds Column*
 2006- Ad-hoc Reviewer
PharmacoEconomics
American Journal of Managed Care

2008- Ad-hoc Reviewer, *Journal of the American Medical Association*
 2008-2013 Editorial Board Member, *Medical Care Research and Review*
 2011 Ad-hoc Reviewer, *Quarterly Journal of Economics*
 2011-2018 Editorial Board Member, *Journal of Pain and Symptom Management*

Honors and Prizes:

1992-1994 Trainee, *Agency for Health Care Policy and Research*
 1994-1995 Trainee, *National Institute of Mental Health*
 1996-1997 Fellow, *Alfred P. Sloan Foundation*

1998-1999 Fellow, *Prudential Health Services*
2002-2007 Recipient, *National Institute for Mental Health K01 Career Development Award*
2007-2011 Recipient, *Robert Wood Johnson Foundation Investigator Award in Health Policy Research*
2012 Recipient, *AcademyHealth Noteworthy Article of the Year*
2012 Nominee, *Harvard Medical School Donald O'Hara Faculty Prize for Excellence in Teaching (Years I & II)*
2012 Recipient, *Medical Care Research and Review Best Paper of the Year*
2013 Nominee, *Harvard Medical School Donald O'Hara Faculty Prize for Excellence in Teaching (Years I & II)*
2014 Nominee, *Harvard Medical School Donald O'Hara Faculty Prize for Excellence in Teaching (Years I & II)*
2017 Recipient, *Barbara J. McNeil Faculty Award for Exceptional Institutional Service to Harvard Medical School and Harvard School of Dental Medicine*
2023 Co-author, *AcademyHealth Publication of the Year*

Report of Funded Projects:

Past

1995-2000
Co-Investigator (Richard Frank)
Brandeis University / National Institute on Drug Abuse
Grant #U1 P50 DA10233

Brandeis/Harvard Center for the Study of Managed Care and Drug Abuse Treatment

This project examines the choice of organization and contract structure of managed behavioral health care and estimates the response to contract features for a set of public and private insurance contracts.

1998-1999
Principal Investigator
Center for Health Care Strategies, Inc./The Robert Wood Johnson Foundation
Grant #ML 375

Procurement Strategies for Medicaid Managed Care Programs Serving Individuals with Chronic and Disabling Conditions

This study examines state and country strategies for the procurement of Medicaid managed care contracts to serve individuals with chronic and disabling conditions.

1998-1999
Research Fellow (Barbara McNeil)
Prudential Health Services Research Fellowship

The Effects of Managed Mental Health Care

This project fosters collaboration between Prudential and Harvard and provides an opportunity for postdoctoral fellows and junior faculty to gain experience in health services research, and particularly in issues pertaining to managed care.

1999-2001

Co-Investigator (Richard Frank)

Eli Lilly Foundation

Managed Care and Therapeutic Choice

This project examines the impact of benefit design (patient incentives), vendor contract provisions (managed care organization incentives), and provider payment, organization and contract features (provider incentives) on treatment choice for depression, anxiety disorder, and alcohol abuse.

1999-2006

Co-Investigator (Joseph Newhouse)

Alfred P. Sloan Foundation

Grant #98-12-7

Managed Care Industry Center

This grant funds the core of the Harvard Managed Care Industry Center. The purpose of the center is to train new researchers on the industry and to initiate collaborative studies to improve industry performance and to identify best practices. The Center's research focus is on the effects of risk-sharing on quality and outcomes of care for both managed care and managed behavioral health care.

2000-2002

Principal Investigator

Robert Wood Johnson Foundation

Grant #036415

The Impact of Medicare Financing Methods on End-of-Life Care

This study examines how different actors involved with providing end-of-life services perceive the strengths and limitations of the current Medicare financing system. In addition, the project explores the implications for future Medicare policy of the issues raised and ways in which the Medicare financing system might be changed to address any problems identified.

2000-2004

Co-Investigator (Richard Frank)

Northrop Grumman Corp. / DHHS
Grant #S-26027

Evaluation of Parity in the Federal Employees Health Benefits Program

For this study evaluating the effects of requiring parity in coverage of mental health and general medical care services within the Federal Employees Health Benefits Program, the Harvard research team will have lead responsibility for constructing all analysis files based on administrative data for all analyses related to costs, utilization, access and quality. The Harvard team will also have responsibility for analysis of costs and utilization data in both the administrative data sets and for the survey research data. Harvard investigators will also participate in the survey design and analysis of patient satisfaction data. Members of the Harvard team will also work on health plan reviews, focus groups and site visits at OPM and eight health plans. Harvard investigators will be involved in the overall evaluation design, the writing of reports of findings and progress of the research. Harvard will also have responsibility for providing the government with analysis files and detailed documentation.

2000-2005

Co-Investigator (Richard Frank)
Robert Wood Johnson Foundation
Grant #039960

Organization and Financing of Primary Care Depression

The goal of this activity is to develop a set of economic incentives and organizational arrangements that support recent advances in the understanding of how depression is most effectively treated in a primary care context. Pursuing this overall goal requires engaging in a number of specific activities aimed at developing and specifying the economic model. There are five main activities: 1) Conduct a review of the literature on treating depression in primary care to identify what has been learned about how the economic and organizational context promote or hinder the effective treatment of depression. 2) Examine secondary data sets to identify common treatment patterns for depression in primary care. 3) Identify and familiarize ourselves with innovative treatment programs aimed at depression in the primary care setting. 4) Analyze the incentives and the organizational structures that promote adherence to appropriate clinical choices. 5) Specify a set of economic and organizational principles to be used in developing a demonstration program.

2001-2004

Co-Investigator (Richard Frank)
Robert Wood Johnson Foundation
Grant #42094

Impact of Incentive Formularies on Prescription Drug and Health Care Costs and Utilization

The fundamental question of how to balance costs, choice of drugs and innovations in the prescription drug area has become one of the more pressing challenges facing the management of health plans. We will trace the diffusion formulary arrangements and analyze factors that influence an employer's or managed care organization's (MCO) decision to use three-tiered formularies and other patient incentive arrangements. Descriptive and multivariate analysis will be used to study the importance of various factors on employer/health plan choices. This study will provide important information for both public and private policymakers on the impacts of one of the new private sector methods of managing pharmaceutical benefits on prescription drug use, pharmacy and total health care spending, and patterns of care.

2000-2005

Co-Investigator (Joseph Newhouse)
Agency for Healthcare Research and Quality
Grant #5 P01 HS10803

Structuring Markets and Competition in Health Care

This Program Project will develop and apply an overarching conceptual framework, drawn from economic theory, for understanding the roles of purchasers, plans, providers, and patients in a market environment characterized by which payers contract with health plans and plans by capitation. Managed care greatly expands the dimensions upon the market structure itself, which determines how payers, plans, and providers both contract and compete with each other. Alternative market structures have different effects on costs and clinical endpoints. Our Program Project will improve understanding of these effects. The R01 led by Dr. Huskamp examines two types of benefit carve-out arrangements (pharmacy carve-outs and mental health and substance abuse (MHSA) carve-outs) and explores their impacts, including any cost shifting that resulted from use of carve-outs.

2004

Principal Investigator
Henry J. Kaiser Family Foundation
Grant #02-1237-600

Analysis of the New Medicare Prescription Drug Law

This project analyzes the key features of the Medicare Modernization Act of 2003 and discusses implications of these features for cost, access, and quality of care for Medicare beneficiaries.

2004-2006

Principal Investigator
Technical Assistance Collaborative / MacArthur Foundation
Grant #03-78360-000-HCD

Variations in Quality of Depression Treatment among Specialty Mental Health Providers

This study uses claims data from a large managed behavioral health care organization to examine the provision of quality care within a network of specialty mental health providers.

2005-2007

Co-Investigator (Meredith Rosenthal)
Robert Wood Johnson Foundation
Grant #056107

Uptake and Impact of Health Risk Appraisals

Efforts to inform and motivate consumers to make better health and health care choices have diffused throughout the health care market. One of the central components of these consumer health management programs is the health risk appraisal (HRA). HRAs are structured surveys designed to identify a wide range of health risks, including genetic predispositions to disease, poor health habits, and lack of adherence to recommended care for a chronic condition. In this study, we explore the potential of HRAs to engage consumers in health improvement. In particular, we will examine the overall rates of HRA completion in a privately-insured population, the impact of a consumer financial incentive on HRA completion, the characteristics of consumers who opt to complete an HRA, and early effects of HRAs on utilization and health behavior.

2002-2008

Principal Investigator
National Institute of Mental Health
Grant #K01 MH66109

Economics of Formulary Design and Mental Health Policy

This Mentored Research Scientist Development Award would allow Dr. Haiden Huskamp, a health economist with expertise in mental health policy and economic institutions, to supplement her economic tools with the knowledge and skills needed to conduct clinically-relevant and policy-significant research on the economics of prescription drugs used in the treatment of mental illnesses. The specific aims of this career development proposal are to: 1) develop a greater understanding of clinical decision making related to the use of psychotropic drugs; 2) acquire basic knowledge of psychopharmacology; and 3) expand knowledge of the important economic institutions influencing the prescription drug market. In this undertaking, Dr. Huskamp will be guided by her sponsor, Richard Frank, PhD, and co-sponsors, Andrew Nierenberg, MD, and Ernst Berndt, PhD.

2008-2009

Principal Investigator
Charles H. Farnsworth Trust, \$54,529

Hospice Utilization among Terminally Ill Nursing Home Residents in New England Communities

Using data from a large regional hospice serving nursing home residents in five New England states and data on nursing home characteristics and quality of care, we will document the variation in timing of hospice referral across nursing homes, identify patient characteristics and nursing home characteristics that are associated with earlier referral to hospice, and examine whether nursing homes that provide higher quality nursing care are more likely to make earlier referrals to hospice.

2005-2008

Co-Investigator (Sharon-Lise Normand)
National Institute of Mental Health
Grant #R01 MH061434

Modeling Treatment Use & Effectiveness in Mental Health

This application seeks continued support for a team of statisticians, economists, and clinicians to collaborate on the development and application of longitudinal hierarchical discrete choice models for understanding diffusion of mental health technologies and for causal inference. Dr. Huskamp does not have any effort budgeted for year two of this project. This project has a no-cost extension thru 7/31/09.

2008-2009

Co-Investigator (John Ayanian)
National Cancer Institute
Grant #U01 CA093324

Cancer Care Outcomes Research & Surveillance Consortium (CanCORS)

The objectives of the CanCORS initiative are to: 1) enhance monitoring and understanding of the processes of cancer care and patient-centered factors influencing prognosis in population-based cohorts of lung and colorectal cancer patients; 2) establish a system for examining the relationship of the processes of care to clinical and patient-centered outcomes, with emphasis on measuring the dissemination of state-of-the-science interventions and their association with better quality outcomes in the general population of cancer patients; and 3) examine disparities in the receipt of state-of-the-science cancer care and factors that contribute to disparities in outcomes and identify ways to lessen those disparities. This project is in a no cost extension phase.

2009-2010

Multiple PI
Medicare Payment Advisory Commission, \$43,682 (MedPAC)
Contract # E4058946

Medicare Part D, Long-term Care Pharmacies, and Nursing Facilities

To assess the impact of Part D in the nursing home setting, we will conduct interviews of key stakeholders on the impact of Part D on medication access, care delivery, and quality of care outcomes for nursing home residents.

2007- 2011

Principal Investigator

Robert Wood Johnson Foundation Investigator, \$252,901

Award in Health Policy Research Program

Grant #60468

Has the Revolution Come and Gone? The Societal Value of New Psychotropic Drugs

The past two decades were a period of rapid development of new drug treatments for mental illness. Some believe these new drugs have brought about “revolutionary” changes in the treatment of mental illness. At the same time, the growth in psychotropic drug costs has been explosive. Rapid cost increases combined with high accounting profits have brought increased scrutiny to drug manufacturers over whether the drugs they produce are worth the costs. This project will compare the social costs and benefits of newer psychotropic drugs to assess their social value and then identify ways that the value of psychotropic drug spending can be increased.

2008-2011

Principal Investigator

National Institute of Mental Health, \$663,553

Grant #R01 MH080797

Effects of Mental Health Parity on High-Cost and Severely-Ill Individuals

Mental health parity policies aim to protect individuals with severe mental illnesses against the catastrophic costs of seeking treatment, and, in doing so, increase efficiency and fairness in the insurance market. In 2001, all plans participating in the Federal Employees Health Benefits (FEHB) Program were required to offer coverage for MH/SA services on a par with general medical services. This study will: 1) assess whether individuals with high MH/SA expenditures disproportionately benefited from the comprehensive FEHB parity policy, 2) compare characteristics of high spenders before and after parity adoption, and 3) examine how parity affected the composition, intensity, and quality of treatment received

2010-2013

Co-Investigator

Agency for HealthCare Research and Quality

Grant # R01 HS018960

Assessing the Effect of FDA Advisories on Psychotropic Medications

This project will assess the impact of FDA safety advisories and black box warnings on prescription drug utilization by patients and physician prescribing patterns for three classes of psychotropic medications (antidepressants, antipsychotics, and stimulants).

2010-2013

Co-Investigator

National Institutes of Health

Grant # 1RC4MH092717

Accounting for Confounding Bias and Heterogeneity in Comparative Effectiveness

This proposal seeks to develop novel and generalizable methods for addressing these problems. Specifically, we will develop novel approaches for combining data from randomized trials, registries and/or claims-based data (taking advantage of the strengths of both RCT and observational data); extend the latest techniques for instrumental variable analysis; and develop novel simultaneous equation models to account for confounding that are less sensitive to assumptions than currently-used methods. In so doing, we will apply these methods to three important clinical examples: treatments for bipolar disorder for patients with psychiatric comorbidity, reformulations of existing psychiatric drug treatments, and the surgical repair for abdominal aortic aneurysm (AAA).

2009-2014

Co-Investigator

National Institute on Aging

Grant #PO1 AG032952

The Role of Private Plans in Medicare

The Program Project intends to undertake a fundamental examination of the economics of Medicare Part C, or Medicare Advantage (MA) from a framework grounded in economic theory. The Project is organized around five integrated component projects studying: 1) The factors influencing beneficiary choice of MA plan or traditional Medicare (TM); 2) How MA plans decide about entry and choose the overall generosity of benefits, depending upon Medicare payment policy; 3) Plans' choice of the mix or structure of their benefits in light of possible opportunities for efficiencies from integration and incentives for selection due to imperfect risk adjustment; (4) The consequences (spillovers) of plan choices about entry and practice patterns for beneficiaries in TM and non-Medicare populations; and 5) The design optimal payment, regulatory, and informational policies for Medicare to set for MA plans.

2009-2014

Principal Investigator

National Institute on Aging, \$855,595

Grant #R01 AG034085

Medicare Part D Plan Generosity & Dual-Eligible Nursing Home Residents

This study will examine the effect of Medicare Part D drug plan generosity on medication use and health outcomes for dual-eligible nursing home residents. We will combine drug utilization data from a large long term care pharmacy, data on health outcomes from the Minimum Data Set (MDS), and Medicare Part A hospitalization claims for the period 2005-2008.

2009-2014

Consortium PI

Harvard Pilgrim Health Care / AHRQ, \$120,027

Grant #R01 HS018577-01

Drug Cost Containment Changes and Quality of Care for Mentally Ill Dual Enrollees

This study will examine the impact of the shift from Medicaid drug coverage to Medicare Part D among dual eligibles with schizophrenia or bipolar disorder.

2013-2015

Multi-PI

Commonwealth Fund, \$178,011

Grant # 20130499

Impact of Accountable Care Organization Models with Risk Based Payments on Individuals with Mental Illness

This study assesses the effect of accountable care organization models on mental health service use and spending, and on total health care spending for individuals diagnosed with a mental illness, including those with multiple co-morbidities.

2013-2014

Co-Investigator

Laura and John Arnold Foundation

Health Care Markets and Regulation Lab: Seed Funding

Overall objective: To help the U.S. healthcare system move forward by providing critical evidence, analyses and tools necessary to design health care regulations and markets to promote high quality care and innovation at a

sustainable cost. Initial phase (seed) objectives include: (1) establish an organizational and governance structure, (2) set priorities within and between program areas, and (3) identify feasible, transformative projects

2012-2016

Multi-PI National Institute of Mental Health, \$ 1,172,397
Grant #R01 MH093359

Influences on Psychiatrist Prescribing of Antipsychotics

This project examines the factors that influence the speed with which psychiatrists adopt new antipsychotics and respond to new evidence on their comparative effectiveness and safety, including organizational factors, commercial influences, and policy levers.

2014-2016

Co-Investigator
DHHS/Office for the Asst. Secretary for Planning and Evaluation (ASPE)

Healthcare Integration in Medicare Accountable Care Organizations

Using both quantitative and qualitative methods, this project will examine the impact of Accountable Care Organizations (ACOs) in Medicare on behavioral health care and outcomes and explore the extent to which ACOs target behavioral health conditions for value-enhancing changes in care management.

2012-2016

Co-Investigator
National Cancer Institute
Grant # R01CA164021

Explaining Variations in End-of-Life Care Intensity

This study will expand our understanding of the factors contributing to the high expenditures and intensity of end-of-life (EOL) care for individuals with advanced cancer and will help to identify the appropriate targets for strategies to address disparities in EOL care. If differences in EOL care intensity are primarily driven by physicians, local area practice patterns, and availability of services (e.g., intensive care beds), the findings will identify opportunities for interventions to assure that patients obtain care at the EOL that matches their preferences, and it will identify opportunities to decrease intensity of care in areas where such care is not driven by patients' preferences. If high-intensity EOL care is driven by patients' preferences, then it will be important

to assess if these are informed preferences and, if not, whether they can become informed preferences (e.g., preferences that may be modifiable through EOL discussions).

2014-2016

Co-Investigator

American Cancer Society/University of North Carolina

Impact of Parity Legislation on Use and Costs of Oral Cancer Medications

Capitalizing on a natural experiment, we will use national health insurance claims data to estimate the impact of oral cancer medication parity legislation on the use and spending for cancer therapies. We will use a difference-in-difference-in-difference modeling strategy to examine care before and after parity legislation in states that did and did not adopt parity legislation, and among patients who are or are not enrolled in self-insured plans that are exempt from state-level legislation. Analyses will focus on changes in overall and proportional use of oral cancer therapies (Aim 1); changes in spending on cancer treatment for patients and insurers (Aim 2); and changes in adherence to oral cancer medications (Aim 3).

2015-2016

Co-Investigator

Vanderbilt University Sub u/d ASPE, \$43,897

Tracking the Impact of Ownership Changes in Hospice Care Provided to Medicare Beneficiaries

This project will examine hospice ownership and the impact of ownership changes on hospice utilization for Medicare beneficiaries at the end of life.

2012-2017

Co-Investigator

National Institute of Mental Health, \$159,671

Grant # R01 MH093414

Implementation of Federal Mental Health Parity

In October 2008, the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity (MHPAE) Act was passed by the U.S. Congress. This law is the culmination of a decades-long effort to achieve comprehensive federal insurance parity. Advocates have raised concern related to how certain diagnoses and treatments will be covered under the law. Also, employers and health plans have indicated apprehensions about

extending parity to out-of-network (OON) services. This study examines the effects of these specific provisions of the law.

2014-2017

Principal Investigator

National Cancer Institute, \$270,500

Grant # R21 AG047175

Comparative Effectiveness of Treatment Regimens in Lung Cancer

In this study, we compare the morbidity and mortality of elderly Medicare patients with newly diagnosed extensive stage small cell cancer (ES SCC) ES SCL according to which one of the two standard first-line chemotherapy regimens they received. To do this, we apply sophisticated analytic methods (including propensity scores) to a Medicare-based data source to identify and then match elderly Medicare patients with ES SCLC who received the combination of drugs “cisplatin-etoposide” as first-line treatment of their cancer to otherwise similar elderly Medicare patients with ES SCLC who received a different combination of drugs “carboplatin-etoposide” as first-line treatment of their cancer. The results will be important to the field of comparative effectiveness research through our treatment of hospital-based health care (e.g., emergency room visits, hospitalizations, and intensive care use) as morbidity (i.e., a “toxicity” or “burden”). The results will also be immediately relevant to clinical geriatric oncology through provision of estimates of risk and benefit according to treatment and in so doing aid in patient-oncologist decision-making.

2013-2018

Multi-PI

National Institute on Drug Abuse, \$1,585,657

Grant #R01 DA035214

Substance Use Disorder Treatment under New Payment and Delivery System Models

This study assesses the effect of global payment and accountable care as implemented through the Blue Cross and Blue Shield of Massachusetts’ Alternative Quality Contract (AQC) initiative on changes in use, price, spending, and performance measures for substance use disorder (SUD) and nicotine dependence services.

2013-2018

Co-Investigator

University of Pittsburgh / NHLBI, \$103,928

Grant # R01 H1119246

The Role of Physician Networks in the Adoption of New Prescription Drugs

This project would link data from multiple sources to: 1) examine the association at the regional-level between physician adoption of new drugs that treat cardiovascular disease (CVD), and CVD medication use and spending, and non-drug medical spending, and 2) examine the influence of physician characteristics and multiple types of professional networks on physician adoption of new CVD medications.

2014-2017

Co-Investigator

Laura and John Arnold Foundation

Health Care Markets and Regulation Lab

Overall objectives: (1) Initiate specific, innovative, high impact projects that have the potential to meaningfully support the transformation of the American Health Care system. Research areas include: quality measurement, payment and delivery system reform, consumer behavior, risk adjustment and exchanges. (2) Develop core resources to support the aforementioned projects, move forward on existing work and enhance the visibility and impact of lab activities.

2017-2018

Multi-P.I.

Vanderbilt University Medical Center/ASPE, \$57,734

(Contract # HHSP233201700036C)

Trends in Nursing Home-Hospice Contracting and Common Ownership between Hospice Agencies and Nursing Homes

This project will explore the dynamics of nursing home-hospice contracting and how it has evolved over time. A key focus of the research is to explore implications of joint ownership between hospice agencies and nursing homes.

2013-2019

Multi-PI

NIH/NIMH, \$1,606,288

Grant # U01 MH103018

Technology Diffusion Pathways

This study will conduct an in-depth investigation of the patterns of diffusion of new technologies, including drugs, biologics, and devices, across organizations of different types, and assess the effects of a new model for organizing and financing health care that is encouraged under the Affordable Care Act (ACA) of 2010 – risk-based payments made to accountable care organizations (ACOs) – on spending for new technologies.

2017-2020

Co-Investigator

Laura and John Arnold Foundation

Health Care Markets and Regulation Lab

Overall objectives: (1) Initiate specific, innovative, high impact projects that have the potential to meaningfully support the transformation of the American Health Care system. Research areas include: quality measurement, payment and delivery system reform, consumer behavior, risk adjustment and exchanges. (2) Develop core resources to support the aforementioned projects, move forward on existing work and enhance the visibility and impact of lab activities

2019-2020

Multi-P.I.

March Of Dimes, \$90,866

The Affordable Care Act and Low-Income Women.

This project will assess the impact on low-income women of losing coverage obtained under the Affordable Care Act.

2018-2020

Co-Investigator

Vanderbilt University Medical Center Sub u/d Commonwealth Fund

Identifying Cost and Coverage Barriers to Medicare Beneficiary Access to Specialty Drugs

This study will describe recent trends in prices, Medicare Part D plan coverage, and cost sharing requirements for specialty drugs. The study will also identify rates of and factors associated with never filling, or experiencing delays in filling, prescribed specialty medications

2015-2021

Co-Investigator

Brandeis University/ National Institute on Drug Abuse

(Grant # P30 DA035772)

Center to Improve System Performance of Substance Use Disorder Treatment

The Center will use research on payment methods and service delivery approaches to expand the research base on improving substance use disorder (SUD) care quality and reduce the cost of health care services, and to inform policy decisions that will profoundly affect the cost, quality and availability of SUD treatment services.

2017-2020

Multi-P.I.

Vanderbilt University Medical Center/ASPE, \$103,709
(Contract # HHSP233201700050C)

Opioid Use in Nursing Homes

This project will examine recent trends in opioid prescribing among nursing home residents.

2018-2020

Co-Investigator

Vanderbilt University Medical Center Sub u/d Leukemia and Lymphoma Society

Identifying Cost and Coverage Barriers to Medicare Beneficiary Access to Specialty Drugs

This study will describe recent trends in prices, Medicare Part D plan coverage, and cost sharing requirements for specialty drugs. The study will also identify rates of and factors associated with never filling, or experiencing delays in filling, prescribed specialty medications

2018-2022

Co-Investigator

Johns Hopkins University / NIDA, \$61,423
(Grant # R01 DA044201)

Consumer-Directed Health Plans and Substance Use Disorder Treatment

This project will examine the impact of the shift toward consumer-directed health plans on use of substance use disorder treatment services.

2020-2022

Co-Investigator

(Grant # 20202697) *co-funded
The Commonwealth Fund (via VUMC)

Evaluating the Role of Rebates on Medicare Formulary Coverage, Market Share, and Patient and Plan Spending

We will document drug list and net price trends in Medicare and examine the relationship between average rebate size and Part D formulary placement, beneficiary cost sharing, and product market share within a drug class. We will also assess trends in list and net prices for Part D drugs after generic competition occurs and whether drugs with large rebates have more generous formulary coverage and less use of generic alternatives. Finally, we will explore pricing dynamics and market share for authorized generics (i.e., exact copies of branded drugs that exclude

the brand name from packaging), including their use relative to traditional brands and traditional generics for the same product.

2020-2022

Co-Investigator

Telemedicine for Treatment of Opioid Use Disorder

This project is a comprehensive evaluation of telemedicine for opioid use disorder using Medicaid, Medicare, and commercial insurance data as well as a series of qualitative interviews.

2017-2026

Multi-PI

National Institute of Mental Health \$514,756

(Grant # R01 MH112829)

Impact of Telemedicine on Medicare Beneficiaries with Mental Illness

Access to mental health specialists is difficult for many patients in the U.S., particularly for the poor and those who live in rural communities. Telemental health is one potential solution for this access problem. In the proposed project we will conduct a series of descriptive analyses to understand how telemental health is being

used and whether communities with greater telemental health penetration have experienced improvements in care for patients with mental illness.

2021-2025

Multi-P.I.

(Grant # 1R01AA029267)

Medications for Alcohol Use Disorder: Unfilled Prescriptions and Treatment Trajectories

Many individuals with alcohol use disorder (AUD) receive no treatment, including evidence-based medications. This study, using linked electronic health record data on medication orders and claims data (combined with qualitative methods), will allow more precise identification of where individuals fall off the path of AUD medication use.

2022-2026

Co-Investigator

Unpacking Disparities in Opioid Use Disorder Treatment Quality

Few studies have undertaken more nuanced approaches to examining the quality of care for opioid use disorder (OUD) that take into account differences that may compound across dimensions such as race, ethnicity, gender, and age groups, referred to as intersectionality. This study will investigate differences in use of OUD treatments and the quality of OUD care by intersectional status and examine key drivers of those differences.

2022-2027

Multi-P.I.

(Grant # 1R01AA030539)

Telehealth in the Treatment of Alcohol Use Disorders: Impact on Access, Disparities, and Quality of Care

Alcohol use disorder (AUD) is a major cause of illness, disability, and death, and there are longstanding challenges in barriers to and disparities in care. This mixed-methods study will examine how telehealth is being incorporated into AUD treatment and whether its use is associated with improved patient outcomes and equity.

Report of Local Teaching and Training

Teaching of Students in Courses:

- 1999-2005 HC704 Introduction to Health Care Policy
Co-Director
Approximately 25 first-year medical students
Harvard Medical School, 1 two-hour session p/week for 14 weeks
- 2007-2009 HC750 Health Care Policy
Co-Director
140 second-year medical students
Harvard Medical School, 1 two-hour session p/week for 14 weeks
- 2010-2015 HC750 Health Care Policy
Co-Director
140 first-year medical students
Harvard Medical School, 5 two-hour sessions p/week for 4 weeks
- 2016-2017 Essentials of the Profession: Evidence, Ethics, Policy, and Social Medicine
Co-Director
170 first-year medical and dental students
Harvard Medical School, 12 two-hour sessions
- 2019-2021 Essentials of the Profession
Small Group Leader
10-12 first-year medical and dental students
Harvard Medical School, 8 one-hour sessions

Formal Teaching of Residents, Clinical Fellows and Research Fellows (post-docs):

1997- Doctoral Seminar in Health Care Policy
Harvard University Ph.D. Program in Health Policy
20-25 first-year doctoral students in Health Policy
1-4 lectures per year

1997- Doctoral Seminar in Health Economics
Harvard University Ph.D. Program in Health Policy
2-8 second-year doctoral students in Health Economics
1-2 lectures per year

2000-2001 Introduction to Health Care Policy
Kennedy School of Government
25-30 masters' students in Public Policy
1 lecture per year

2004-2006 Introduction to the U.S. Health Care System
Cambridge Hospital Integrated Clerkship Program
8-10 clerkship students
1 lecture per year

2005-2006 Introduction to Health Care Policy
Beth Israel Deaconess Medical Center—Fellowship in Geriatric Medicine
8 fellows
3 lectures per year

2007 Medicare, Medicaid and Rising U.S. Health Care Costs
Harvard Medical School/Brigham and Women's Hospital—Patient-Doctor III Tutorial
12-15 third-year medical students
1 lecture

2009-2010 Principal Investigator
Ongoing mentoring sessions
NIMH Pre- and Post-Doctoral Training Grant
#T32MH019733
4 pre-doctoral and 2 post-doctoral trainees

2009 Pre- and Post-doctoral Seminar in Mental Health Policy
10 sessions
4 pre-doctoral and 2 post-doctoral trainees

2011 Private Health Insurance
Partners HealthCare
15-30 resident physicians

2016 Mental Health Policy
Harvard School of Public Health
1 lecture
40-50 masters' students

2018- Principal Investigator
Ongoing mentoring
NIMH Pre- and Post-Doctoral Training Grant
#T32MH019733
4 pre-doctoral and 2 post-doctoral trainees

2018 Steering Committee Member
Ongoing mentoring
NCI Training in Oncology Population Sciences (TOPS)
#T32CA09220317
3 post-doctoral trainees

2019 Mental Health Policy (HLTHPOL3002)
2021 Co-Director
2023 Harvard Graduate School of Arts and Sciences
10 sessions
10-12 graduate students and post-doctoral fellows

Formally Supervised Trainees and Faculty:

1997-2000 Susan Busch, Ph.D.
Professor, Dept. of Health Policy & Management
Yale University School of Medicine

Dissertation Committee Member—Supervised completion of three dissertation essays and two papers in peer reviewed journals

2000-2002 David Auerbach, Ph.D.
Policy Researcher, RAND

Dissertation Committee Member—Supervised completion of three dissertation essays

2001-2004 Colleen Barry, Ph.D.
Fred and Julie Soper Professor and Chair
Johns Hopkins Bloomberg School of Public Health
Dept. of Health Policy and Management

Dissertation Committee Member—Supervised completion of three dissertation essays and three papers in peer reviewed journals

2001-2002
Andrea Magyera
Current position unknown

Undergraduate Thesis Advisor for Harvard College—Supervised completion of senior thesis

2002-2004
Laura Eselius, Ph.D.
Senior Fellow
Deloitte Research

Dissertation Committee Member—Supervised completion of three dissertation essays and one paper in peer reviewed journal

2003-2005
Stephanie Shimada, Ph.D.
Research Assistant Professor of Health Policy and Management
Boston University

Dissertation Committee Member—Supervised completion of three dissertation essays and one paper in peer reviewed journal

2004-2007
Yuting Zhang, Ph.D.
Associate Professor
University of Pittsburgh, School of Public Health

School of Public Health Dissertation Committee Member—Supervised completion of three dissertation essays and three papers in peer reviewed journals

2007-2009
Katy Backes Kozhimannil, Ph.D.
Professor
University of Minnesota School of Public Health

Dissertation Committee Co-Chair—Supervised completion of three dissertation essays and two papers in peer reviewed journals (thus far)

2008
Samuel Kina
Associate, Analysis Group

Dissertation Committee Member

2008-2009
Jennifer Polinski

Director
Foundational Research

CVS Caremark Corporation Dissertation Committee Member -- Supervised completion of three dissertation essays (student currently on maternity leave)

2008-2009
Kyle Gibler
Partner
McKinsey and Company

Undergraduate Thesis Advisor for Harvard College—Supervised completion of senior thesis and one paper in peer-reviewed journal

2009
Marguerite Burns, Ph.D.
Associate Professor
University of Wisconsin-Madison School of Medicine and Public Health

NIH K01 Career Development Award Mentor

2010
Meredith Chace
Current Position Unknown

Dissertation Committee Member

2010-2011
Sara Toomey, M.D.
Assistant Professor in Pediatrics
Harvard Medical School, Boston Children's Hospital

NIH K01 Career Development Award Application Mentor

2010-2012
Stacie Dusetzina, Ph.D.
Associate Professor
Vanderbilt University

Supervised Post-Doctoral Fellowship in Mental Health Policy Research

2013-2015
Kirstin Scott, M.D., Ph.D.
Medical Resident
University of Washington

Dissertation Committee Member

- 2015-2016 Savannah Bergquist, Ph.D.
Post Doctoral Fellow
Stanford University
- Advisor*
- 2016 Yuhua Bao, Ph.D.
Associate Professor
Weill Cornell Medicine
- Member of Mentoring Committee*
- 2016 Kelsey Berry, Ph.D.
Lecturer in Global Health and Social Medicine
Harvard Medical School
- Dissertation Committee Chair*
- 2018-2020 Bryan Buckley, Sc.D.
Student
Harvard School of Public Health, DrPH Program
- Dissertation Committee Member*
- 2019- Rebecca Stewart, Ph.D.
Research Associate
University of Pennsylvania Perelman School of Medicine
- K23 Mentor*
- 2020- Benjamin Barsky, J.D.
Student
Harvard University
- Dissertation Committee Member*
- 2022- Marema Gaye
Student
Harvard University
- Dissertation Committee Member*

Report of Education of Patients and Service to the Community

1996	Advisor	State of Arizona, Office of the Auditor General
1996-1997	Member, Development Team for Technical Assistance Publication	U.S. Public Health Service, Substance Abuse and Mental Health Services Administration
1997-1998	Member, Technical Advisory Panel	The Robert Wood Johnson

		Foundation Home Care Research Initiative
1999-2000	Consultant, Veterans Administration Pharmacy Formulary Analysis Committee	Institute of Medicine
1999-2004	Co-Sponsor, Joint Seminar on Health Economics	Boston University, Harvard University, Massachusetts Institute of Technology
2000-2002	Member, Advocacy Committee	Coalition for Health Services Research
2001-2002	Member, Committee on Care for Children Who Die Their Families	Institute of Medicine and
2002-2009	Associate Member	MacArthur Foundation Network on Mental Health Policy
2002-2003	Chair, Behavioral Health Committee	AcademyHealth Annual Research Meeting
2003-	Member, Advisory Board, Policy Synthesis Project	Robert Wood Johnson Foundation
2005-2006	Member, Behavioral Health Committee	AcademyHealth Annual Research Meeting
2006-2007	Commission Member, Special Commission on Ambulatory Surgical Centers and Magnetic Resonance Imaging	Commonwealth of Massachusetts Senate and House of Representatives, Joint Committee on Health Care Financing
2006-2007	Member, Behavioral Health Committee	AcademyHealth Annual Research Meeting
2008	Member, Expert Panel on Evaluating Plan Management of the Medicare Drug Benefit	Medicare Payment Advisory Commission (MedPAC)
2008	Member, Consultation Team on Mental Health, Guide to Community Preventive Services	Centers for Disease Control and Prevention (CDC)
2008-2009	Chair, Behavioral Health Committee	AcademyHealth Annual Research Meeting

2009-2010	Member, Planning Committee	AcademyHealth Annual Research Meeting
2009-2010	Member, Committee on Accelerating Rare Diseases Research and Orphan Products Development	Institute of Medicine
2009-2011	Acting Director/Principal Investigator, Training Program in Mental Health Policy NIMH (T32 MH019733)	Harvard University
2010	Co-Chair, 15 th Biennial NIMH Mental Health and Economics Conference	National Institute of Mental Health
2011-2014	Member, Technical Expert Panel, CMS Hospice Payment Reform Project	Centers for Medicare & Medicaid Services (CMS)
2012-2017	Co-Director, Training Program in Mental Health Policy NIMH (T32 MH019733)	Harvard University
2014-2015	Member, Committee on Developing Evidence-Based Standards for Psychosocial Interventions for Mental Disorders	Institute of Medicine
2015-2016	Chair, Behavioral Health Committee	AcademyHealth Annual Research Meeting
2016-2022	Member, Roundtable on Quality Care for People With Serious Illness	National Academies of Science, Engineering, and Medicine
2017	Co-Chair, Financing and Payment Strategies to Support High-Quality Care for People with Serious Illness: A Workshop	National Academics of Science, Engineering, and Medicine
2017-	Director/Principal Investigator, Training Program in Mental Health Policy NIMH (T32 MH019733)	Harvard University
2021	Member, Medicare Advantage Value-based Insurance Design Hospice Network Adequacy Technical Expert Panel	Centers for Medicare and Medicaid Services (CMS)
2021-2022	Co-Chair, Behavioral Health Theme Leader for Annual Research Meeting	AcademyHealth

Report

Haiden Huskamp, Ph.D., is a health economist and the Henry J. Kaiser Professor of Health Care Policy. Dr. Huskamp has three primary areas of research: 1) mental health and substance use disorder policy; 2) prescription drug policy; and 3) the financing and utilization of end-of-life care services. She also serves as Co-Director of Harvard’s National Institute of Mental Health (NIMH) T32 Pre- and Post-doctoral Training Program in Mental Health Policy.

Dr. Huskamp is Multi-Principal Investigator (MPI) on R01s funded by the National Institute on Drug Abuse (NIDA), the National Institute of Mental Health (NIMH), and the National Institute on Alcohol Abuse and Alcoholism (NIAAA) assessing the use of telemedicine for the treatment of opioid use disorder, mental illness, and alcohol use disorder. She also serves as MPI on an R01 funded by NIAAA on the prescribing and use of medications that treat alcohol use disorder. Dr. Huskamp serves as Co-director of the Brandeis/Harvard SPIRE Center (SUD Systems Performance Improvement Research and Engagement) Center, a NIDA-funded P30 center. She previously served as MPI for an R01 funded by NIMH focused on factors that influence physician adoption and use of antipsychotic medications and an R01 funded by NIDA assessing the effects of new payment and delivery models on substance use disorder treatment. She has published numerous papers on the impact of managed care for behavioral health services on utilization patterns, costs, and quality of care and on the impact of parity in insurance coverage for behavioral health services. Dr. Huskamp previously served as a

member of the Institute of Medicine Committee on Developing Evidence-Based Standards for Psychosocial Interventions for Mental Disorders. She currently serves as a member of the NIAAA National Advisory Council on Alcohol Abuse and Alcoholism.

Dr. Huskamp is an expert on the impact of pharmacy management tools used to control prescription drug costs on drug utilization, cost, and quality of care. She has conducted a number of studies examining the link between prescription drug benefit design, patient out-of-pocket costs, and medication adherence for individuals who use high-cost medications. Through a Robert Wood Johnson Foundation Investigator Award in Health Policy Research, Dr. Huskamp previously examined the social costs and benefits of newer psychotropic drugs to assess their social value and identify ways that the value of psychotropic drug spending can be increased. She previously served as MPI on a NIMH-funded U01 grant examining characteristics of provider organizations that influence the diffusion of new technologies, including prescription drugs. Dr. Huskamp served as a member of the Institute of Medicine Committee on Accelerating Rare Diseases Research and Orphan Products Development.

Dr. Huskamp's research on end-of-life care has examined the changing characteristics of the hospice industry and the effects of industry changes on the provision of end-of-life care, the timing of discussions about hospice care that occur between physicians and patients with advanced illness, and variation in hospice costs across hospice users. She served as a member of the Institute of Medicine Committee on Care for Children Who Die and Their Families and a member of the National Academy of Medicine Roundtable on Quality Care for People with Serious Illness.
